

Millbank's Nuclear Expertise Pays Off for Client Seeking Specialised Skills

Location - North West | Cumbria | South East

Services provided - Key PSL Member. Recruitment of all Engineering, Project Controls and Support Personnel.

The Client is a leading international engineering, project management and services provider to highly regulated industries, including nuclear, defence, oil and gas, and science and research industries.

What did the Client need

Due to the highly regulated nature of their work, the client needed a high standard of candidates for their highly specialised roles. Their existing resource solution provider was struggling to find the right calibre of candidate for a particular key role within nuclear, leading to the job being released to Millbank.

What was Millbank's solution

Owing to Millbank's 35 years' experience within nuclear, and our extensive database of candidates located near their offices, we were able to quickly find and place a successful candidate for the client. This led to several more roles being released and filled in a short time frame. As a result of the trust and confidence we had built with our client, Millbank was added to the main PSL, with all future roles released to us. Nearly a year later, we are now one of the clients' top performing agencies. We have exceeded all SLAs with excellent CV to Interview, Interview to Offer, and Offer to Placement ratios.

“

Millbank have assisted us with QA/QC, CSA, Mechanical, Electrical and Project Control roles. The team always meets requested deadlines and deliver a good level of CV. They have a great interview to placement ratio and are certainly an agency I would recommend to work with.

”

Summary

Thanks to our extensive background sourcing within the nuclear industry, we were able to quickly deliver successful candidates to a leading supplier of services to the nuclear industry for roles their previous suppliers had struggled with.

This has led to Millbank becoming one of their top performing agencies in our first year of working together.
